

OCCUPATIONAL HEALTH AND SAFETY POLICY

Alloy Services are committed to the provision of a safe and healthy work environment and continuously makes every effort to ensure work is conducted in a manner that eliminates risk of injury to employees, plant and the environment.

Responsibility

Management has the prime responsibility to implement this policy and shall consider and include health and safety requirements into all work activities.

Specifically:

- Develop, implement and maintain a safe working environment and system of work.
- Provide information, instruction, training and supervision of work practices to all employees.
- Provide personal protective equipment to protect employees from risk and/or hazards that cannot be otherwise eliminated or controlled
- Develop, implement and audit procedures to cope with emergencies and accidents and provide appropriate medical and first aid facilities.
- Involve safety committee members, management and health and safety representatives in the development of internal company Health and Safety standards.
- Conduct systematic audits to identify and eliminate, as low as reasonably practicable, any work practices and conditions potentially harmful to employees.

Outcome

Alloy Services will continue to actively monitor all safety programs and procedures to ensure the statements outlined in this policy are achieved.
