

QUALITY POLICY

Alloy Services, as a developing company has adopted a policy to ensure the implementation and maintenance of a Quality Management System conforming to ISO 9000.

The quality objective of Alloy Services is to continually improve our performance so that Customers can be confident that they are provided with a service synonymous with safety, reliability and value in all contracts undertaken.

Alloy Services are committed to Quality.

It is our belief that our Customers' Quality requirements can only be attained through the active involvement of all employees.

Our Quality commitment will be achieved through the right training, techniques, supervision and attitude to building a quality product for our clients.

The Manager of Quality and Safety has the authority and organizational freedom to identify quality problems, to initiate, recommend, or provide solutions, and to verify implementation of Quality Systems.

The Quality Manual, Procedures and Quality Plans form the "foundation" of Alloy Services principle, to hand over a quality product built in accordance with codes, specifications and the clients' engineering practices.

Our Quality Management System is fundamental in the training of all employees and during induction of new employees. This ensures that this policy is understood, implemented and maintained at all levels of the organization.
